If you've got toenail fungus, you're not alone

Onychomycosis (on-ick-oh-my-CO-sis), a condition that may involve the toenails or fingernails, is relatively common. It may affect as many as 35 million people in the US — but toenail infections are particularly common. JUBLIA is indicated for onychomycosis of the toenail only.

What is toenail fungus?
Toenail fungus is an infection that lives underneath the nail, in the skin of the nail bed. Toenail fungus is more than a cosmetic concern. Recurrence is common.

Indication
JUBLIA (efinaconazole) Topical Solution, 10% is a prescription medicine used to treat fungal infections of the toenails.

Important Safety Information
• JUBLIA is for use on nails and surrounding skin only. Do not use JUBLIA in your mouth, eyes, or vagina. Use it exactly as instructed by your doctor.
• It is not known whether JUBLIA is effective in children.
• Before you use JUBLIA, tell your doctor about all your medical conditions, including if you are or plan to become pregnant, are breastfeeding, or plan to breastfeed, because it is not known whether JUBLIA can harm an unborn fetus or nursing infant.
• Tell your doctor about all medications you are taking, and whether you have any other nail infections.
• JUBLIA is flammable. Avoid heat and flame while applying JUBLIA to your toenail.

TOENAIL FUNGUS: A range of severity

SYMPTOMS OF TOENAIL FUNGUS MAY INCLUDE:
• Thickening of the nail
• Discoloration
• Change in nail shape
• Loosening/lifting of nail
• Brittleness
• Crumbling of nail edges

Contributing factors
Factors that can increase the risk of developing toenail fungus include:
• Wearing closed-toe shoes
• Getting pedicures with improperly sanitized tools
• Having a chronic illness, such as diabetes or HIV
• Having a deformed nail or a nail disease

Ask your doctor about JUBLIA
An FDA-approved prescription topical solution proven to treat toenail fungus.

Please see additional Important Safety Information on page 4 and full Prescribing Information for JUBLIA, including Patient Information and Instructions for Use.
See for yourself: Clinically proven results with JUBLIA

OVERALL RESULTS FROM 2 CLINICAL STUDIES:

17% of patients had completely clear nails
Complete Cure: No fungus present and 0% visible toenail impairment

25% of patients had clear or mostly clear nails
Complete or Almost Complete Cure: No fungus present and no more than 5% visible toenail impairment

54% of patients tested fungus-free
Mycological Cure: Negative examination and negative laboratory culture

In 2 separate clinical studies, JUBLIA was applied daily for 48 weeks — working to treat the fungus to allow a clearer nail to grow back.

Results were measured after completing treatment with JUBLIA at 52 weeks.

**INDIVIDUAL RESULTS FROM 2 CLINICAL STUDIES:**
18% of patients in Study 1 and 15% in Study 2 had completely clear nails; 26% of patients in Study 1 and 23% in Study 2 had clear or almost clear nails; and 55% of patients in Study 1 and 53% in Study 2 tested fungus-free.

Photos have not been retouched. Individual results may vary.

Important Safety Information (cont’d)

- JUBLIA may cause irritation at the treated site. The most common side effects include: ingrown toenail, redness, itching, swelling, burning or stinging, blisters, and pain. Tell your doctor about any side effects that bother you or do not go away.

Please see additional Important Safety Information on page 4 and full Prescribing Information for JUBLIA, including Patient Information and Instructions for Use.
Using JUBLIA

JUBLIA is specifically formulated to reach the site of infection to treat toenail fungus.

JUBLIA is applied here, as well as around and under the nail. Nail bed where fungus lives under the nail — and where JUBLIA fights it.

Side effects

- Low incidence of side effects: The most common side effects (around 2% of patients) in clinical trials were ingrown toenail, redness, itching, swelling, burning or stinging, blisters, and pain.
- No known drug interactions.

Tell your doctor about any side effects that bother you or do not go away.

Indication

JUBLIA (efinaconazole) Topical Solution, 10% is a prescription medicine used to treat fungal infections of the toenails.

Important Safety Information

- JUBLIA is for use on nails and surrounding skin only. Do not use JUBLIA in your mouth, eyes, or vagina. Use it exactly as instructed by your doctor.

If you answer ‘Yes’ to any of the following questions, talk to your doctor about your toenails and ask if JUBLIA may be right for you.

- Do you have thickened or discolored toenails?
- Are you concerned by the way your toenails look?
- Has the appearance or condition of your toenails caused you to avoid certain events or wearing certain shoes?

Ask your doctor if prescription JUBLIA is right for you.
