HOW YOU CAN HELP MAKE IT EASIER FOR PATIENTS TO COMPLETE TREATMENT

As you know, it’s often a challenge for patients to stay adherent to daily therapy regimens. When it comes to JUBLIA, there are several ways you can help make it easier for patients to complete treatment.

Make it simple for them to learn how to use JUBLIA

Advise patients that proper application is essential to take full advantage of JUBLIA’s antifungal power.1 Direct them to JubliaHowTo.com to watch a video that shows how simple it is to properly apply JUBLIA once a day.

Help them make JUBLIA part of their daily routine1

Useful tips include:

- Applying JUBLIA at the same time and place each day (i.e., in the morning or just before bed)
- Combining it with other activities (i.e., after showering*)
- Setting a reminder on their phone or watch
- Keeping JUBLIA in a convenient place when traveling

Reinforce how important it is to keep going

You may want to acknowledge to patients that 48 weeks1 can seem long, but there are important reasons for sticking with treatment:

- They’re helping themselves and their loved ones. They may not know that their onychomycosis1 puts family members at risk of infection.2
- They may see some clearance sooner, but onychomycosis may not be completely gone and could come back.3
- They may not see the full effect of treatment until they have completed the full course.3 Remind them to be patient and know JUBLIA is working.

*Wait for at least 10 minutes after showering, bathing, or washing before applying JUBLIA.1
1For the treatment of onychomycosis of the toenail(s) due to Trichophyton rubrum and Trichophyton mentagrophytes.

INDICATION

JUBLIA (efinaconazole) topical solution, 10% is indicated for the topical treatment of onychomycosis (tinea unguium) of the toenail(s) due to Trichophyton rubrum and Trichophyton mentagrophytes.

IMPORTANT SAFETY INFORMATION

- JUBLIA is for topical use only and is not for oral, ophthalmic, or intravaginal use.
- Patients should be instructed to contact their health care professional if a reaction suggesting sensitivity or severe irritation occurs.

The JUBLIA Patient Starter Kit provides all the information and resources they need to successfully complete their full course of JUBLIA therapy.

Contact your JUBLIA Sales Representative to receive a supply of Starter Kits for your patients taking JUBLIA.

The most common adverse reactions (incidence >1%) were (vs vehicle): ingrown toenail (2.3% vs 0.7%), application-site dermatitis (2.2% vs 0.2%), application-site vesicles (1.6% vs 0%), and application-site pain (1.1% vs 0.2%).

JUBLIA should be used during pregnancy only if the potential benefit justifies the potential risk to the fetus, and should be used with caution in nursing women. The safety and effectiveness in pediatric patients have not been established.

To report SUSPECTED ADVERSE REACTIONS, contact the FDA at 1-800-FDA-1088 or visit www.fda.gov/medwatch.

Please see JUBLIA Prescribing Information.

*This offer is only valid for patients with commercial insurance. Eligible uninsured patients will pay more.
